Backend Development ASP.NET Core, C#, Entity Framework Core, SignalR, Node.js, Python, Express.js, Flask, RESTful API Development, GraphQL, WebSockets

Database PostgreSQL, SQL Server, Transact-SQL, Redis, MongoDB

Cloud & Infrastructure Docker, Docker Compose, Linux, VPS, AWS, Netlify, Cloudflare, Cloudflare R2, CI/CD Pipelines, GitHub Actions, .NET Aspire

Tools & Technologies Git, Jira, Postman, Grafana, Selenium, PowerShell, Figma, Unity

Soft Skills Teamwork and Collaboration, Flexible and Adaptable, Strong Communication, Problem-Solving

PROJECTS

RIGG

kanesportfolio.com/projects#RIGG | Live: riggposestudio.com

A full-stack SaaS platform for browser-based 3D animation and pose editing.

- Built with React and Three.js on the frontend and ASP.NET Core, PostgreSQL, and Redis on the backend
- Real-time collaborative sessions via SignalR hubs with live bone transform sync
- Stripe subscription gating via Checkout and Customer Portal
- Cloud file storage on Cloudflare R2 with presigned URLs
- Deployed on a Linux VPS with Docker Compose and GitHub Actions CI/CD pipeline

AutoColouringPage

kanesportfolio.com/projects#AutoColouringPage | Live: autocolouring.app

A free, browser-based AI tool that converts photos and illustrations into printable colouring page line art.

- Client-side ML inference via ONNX Runtime Web — fully private, no server uploads
- Web Worker architecture keeps the UI responsive during heavy model processing
- Tile-based inference with weighted blending handles large images without seams

Lyrical Project

kanesportfolio.com/projects#Lyrical-Project

A full-stack web application that uses AI to generate piano roll music.

- Built with Node.js, Flask, React, SQL, and Tone.js

- Integrated locally hosted AI for music sequence generation

Below the Couches

kanesportfolio.com/projects#Below-the-Couches | Play: kanyes.itch.io/below-the-couches

A 2D puzzle game built in Unity using C#.

- Implemented physics-based puzzle mechanics and custom 2D collision detection
- Designed and shipped a complete game to itch.io

PROFESSIONAL EXPERIENCE

Client Support Specialist

Simplicity, Brisbane, QLD | March 2024 – Present

- Shadowed senior developers and sysadmins to assist with debugging ASP.NET Core applications and infrastructure management, building hands-on experience across the full development lifecycle.
- Monitored application health and performance using Grafana dashboards, identifying and escalating issues proactively.
- Wrote PowerShell scripts to automate routine reporting tasks, improving operational efficiency.
- Used Postman to test and diagnose API integrations for client-facing systems.
- Tracked and managed support issues through Jira, coordinating resolutions with development teams.
- Provided technical support to clients, translating complex issues into clear, accessible language.
- Managed AWS security certificates and roles, ensuring system integrity.
- Maintained and updated high-profile university websites, supporting API access and functionality.

Technical Support Analyst

Simplicity, Brisbane, QLD | July 2023 – March 2024

- Worked with DevOps and development teams to troubleshoot and resolve client issues efficiently.
- Automated routine tasks using Python scripts, improving operational productivity.
- Provided first- and second-level support for users, responding quickly to high-priority issues.
- Assisted universities in integrating company software through API support and functionality.

File Clerk

Titan, Brisbane, QLD | July 2018 – January 2020

- Organised and maintained physical and electronic filing systems.
- Streamlined data entry processes, improving retrieval time and system accuracy.

EDUCATION

Bachelor of Science: Information Technology Queensland University of Technology — Brisbane, QLD | February 2021 – Jan 2025

High School Diploma St Augustine's College — Brisbane, QLD | October 2020
